Right side

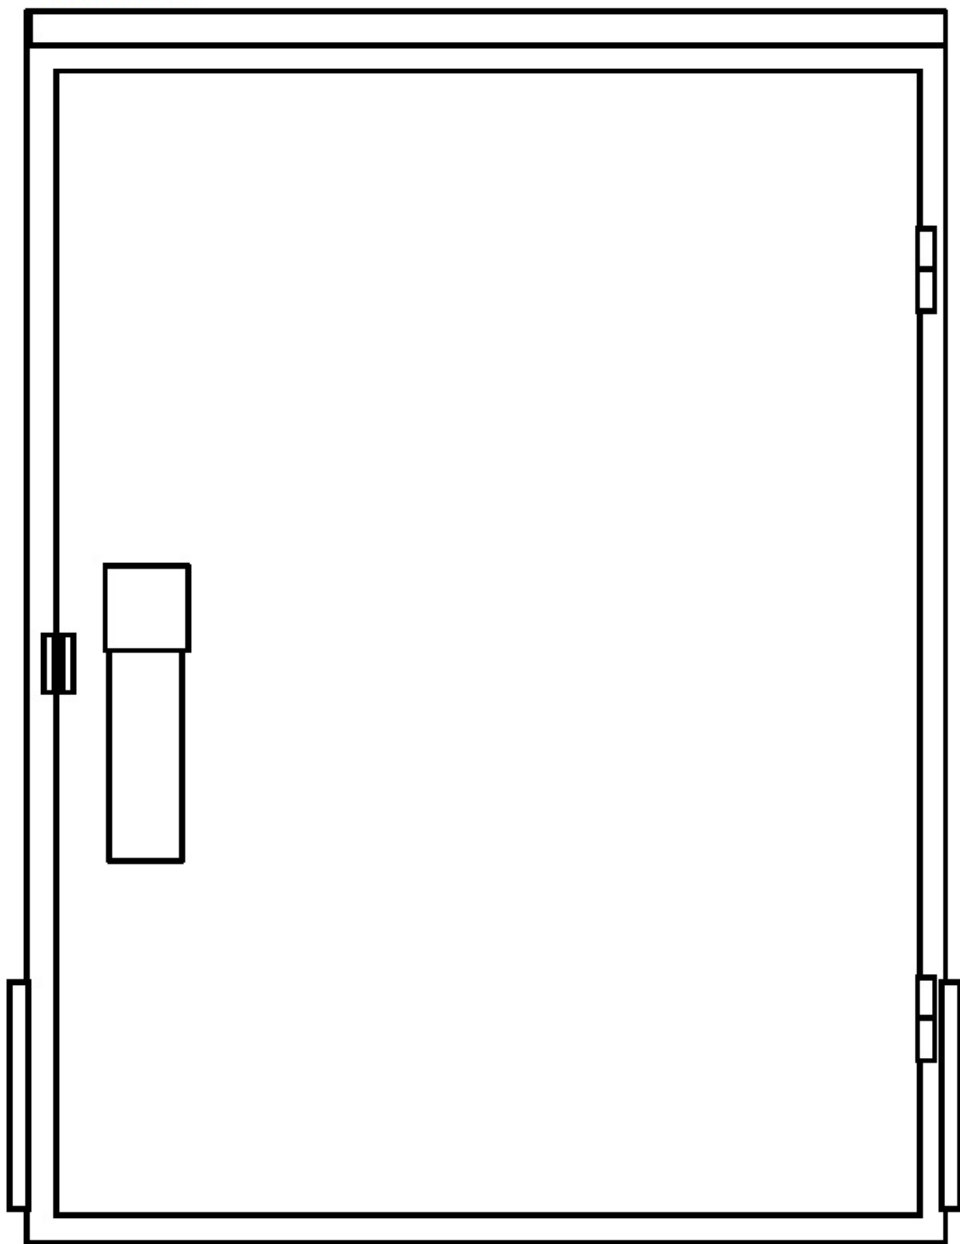

Type 1

Box for connection
of telephone line

Box for connection of
main power 230V 10A.

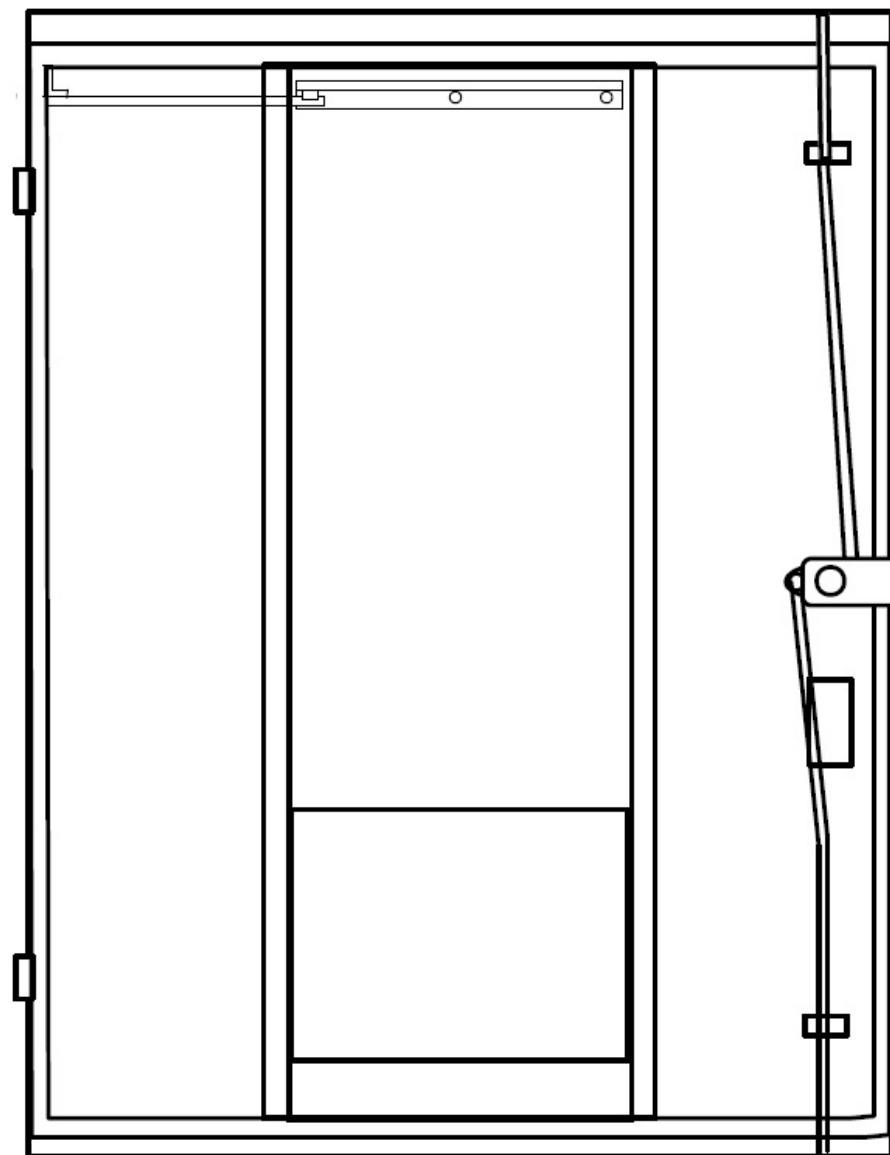

Door Front

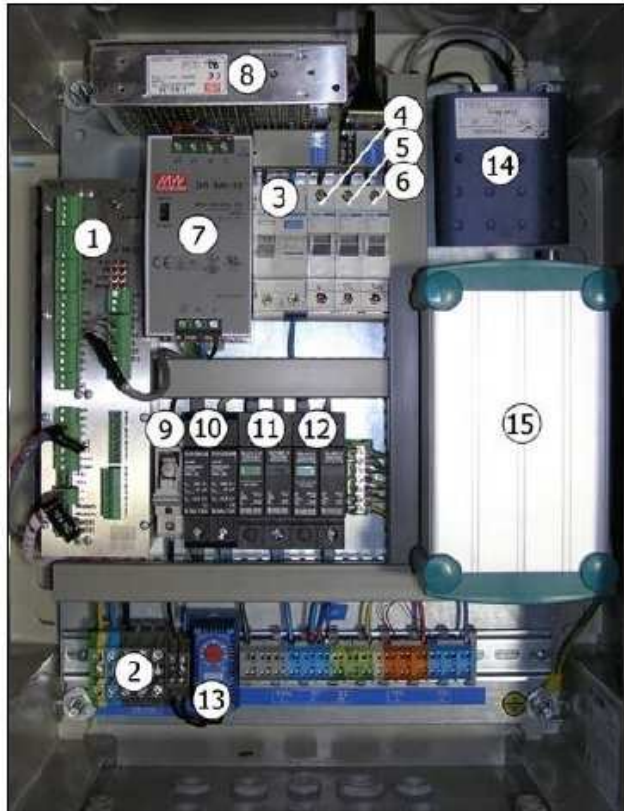

Type 1

Door inside

Type 2

Components of the internal outfit of the meteorological station

Explanation:

1. Meteorological station unit control module
2. Main power supply terminal (230V, 50 Hz L/N/PE)
3. Main circuit protector with overcurrent protection (6 A / 30 mA char. "B")
4. Circuit breaker for external camera system
5. Circuit breaker for internal supplies of the meteorological station switchboard
6. Circuit breaker for video server heating
7. Power supply 12 VDC, 120 W
8. Power supply 24 VDC, 60 W

9. Fuse 6 A
10. Overvoltage diverter SPD type 1 (FLP-A35)
11. SLP single pole overvoltage diverter – protection degree II on L, N conductors
12. DA overvoltage protection of degree III, with indication field
13. Heating temperature control
14. GSM modem
15. Video server (video server heating in bottom part)
