**Integration of navigation monitoring system on the Danube River**

**Publication ref.: EuropeAid/138042/IH/SER/RS**

<b>No.</b>	<b>Question</b>	<b>Answer</b>
1.	Referring to the call of EuropeAid/138042/IH/SER/RS I would like to ask please send us the tender dossier.	In line with restricted procurement procedure, the Contracting Authority sends the tender dossier to the shortlisted candidates. Please refer to PRAG section 2.4.3 <a href="http://ec.europa.eu/europeaid/prag/document.do?nodeNumber=2.4.3">http://ec.europa.eu/europeaid/prag/document.do?nodeNumber=2.4.3</a>
2.	Will the scope of the tender include the delivery of buoys, light poles, masts, lamps and construction works? Will the integration into RIS include server software components? If yes, shall the server software display anything else than the actual operational state of the AtoNs and historic alarms?	The subject of this contract is the Integration of navigation monitoring system on the Danube River. Supply and installation of equipment for navigation monitoring system on the Danube River for the implementation by the Contractor (System Integrator) will be provided through separate supply contract. At the moment, Contracting Authority is not in position to provide you with requested technical information - detailed description of services required under respective contract will be elaborated in the tender dossier which will be sent to shortlisted candidates.
